

It's my understanding that the LNP rule may be delayed this November as it applies to cell carriers. I would like to state that this rule should be enforced for cell carriers (as it is for land line carriers) as soon as possible. Changing cell phone carriers at our small company is burden enough without having to deal with notification of new phone numbers each time we do it. Please do the right thing and implement LNP for cell carriers as soon as possible.

Thanks,
